

ABSORBER AIRBAGS FOR RESIDENTIAL  
AND COMMERCIAL PREMISES

A banner with a blue sky background. On the left, there are two views of a black absorber airbag component: a top-down view and a side view. Below the component views is the logo for 'inCon', which consists of the text 'inCon' in a bold, sans-serif font, a solid purple square, and the text 'Investment and management consulting' below it. On the right side of the banner, there is a large, full-canopied green tree standing in a green field under a blue sky with white clouds.

## TECHNICAL-ECONOMIC BENEFITS OF RUBBER FLOOR CONSTRUCTION ABSORBER AIRBAGS FOR RESIDENTAL AND COMMERCIAL PREMISES.

TECHNICAL BENEFITS	ECONOMIC GAIN
1. Eliminate leveling of the first layer of concrete.	Shortens the technological part of house finishing for 45-60 days (during maturation of concrete).
	Building season is extended to the autumn and winter period.

2. Device designed for quick and easy leveling of the floor while using this technology.	
--	---

3. Installing all types of wiring on the surface of concrete slabs.	Brings direct financial savings of about 30% compared to prices of classical installation settings.
---	---

4. New housing solution for protection against burglars by installing touch sensors below the absorber. Sensors activate protective systems.	This solution is cheaper than existing solutions and completely unexpected for burglars.
--	--

5. Vertical sound isolation in homes thanks to the rubber absorbers and air bag systems and the construction of the floor.	Eliminating all other materials for sound isolation.
--	--

6. Thermal isolation - thanks to the air space between the concrete slab and floor structures.

7. Possibility of simple disassembly and assembly of the floor.

8. Incorporating revision holes in the floor, we get the opportunity to control or retrofitted wiring, as well as performing pest and rodent control.

9. The possibility of placing a grid on the floor of the steel structure without concrete slabs. It is ideal for use on boats, yachts, houseboats ... where there is a great problem of vertical vibration and sound isolation.

10. This floor is the ideal solution for offices that are close to factory production and are exposed to vibration.

#### Awards and acknowledgements

1. Silver medal - KIPA, Seoul, South Korea
2. Silver medal - - Association of Inventors Belgrade
3. Gold medal - Tesla Fest, Novi Sad
4. Gold medal - Construction Fair - Vojvodina, Novi Sad
5. Gold Medal - Business base, Belgrade
6. Gold medal with White Angel image - Technical Fair, Belgrade
7. Gold medal - Business base, Belgrade
8. Gold medal - Tesla fest, Novi Sad
9. Gold medal - Investment Fair of National technology Vojvodina, Novi Sad
10. Gold medal- Investment Fair of National technology Vojvodina, Novi Sad
11. Gold medal - Archimedes, Moscow
12. Special recognition Romania - Cluj, Napoca
13. Honorary Medal of the Russian Union of Inventors
